## **DETAILED ACTION**

## Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 1-9 and 13-17 to an invention non-elected without traverse. Accordingly, claims 1-9 and 13-17 have been cancelled.

#### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-9 and 13-17.

# Allowable Subject Matter

- 3. Claims 10-12 are allowed.
- 4. The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding an integrated circuit package comprising an integrated circuit chip mounted on a substrate in a standoff relationship (i.e. flip-chip), particularly characterized by an encapsulant body which completely encapsulates the chip and includes an encapsulant channel extending from the main

Art Unit: 2812

encapsulant body to a second encapsulant body, wherein the elongated encapsulant channel has a height above the substrate and less than the height of either the first encapsulant body (the body covering the chip) or the second encapsulant cavity.

Further, the first encapsulant body encapsulating the chip, the encapsulant channel and the second encapsulant cavity are all above the substrate and at least the first encapsulant body and the encapsulant channel are adhered to the substrate. Claims 11 and 12 depend from claim 10.

The following reference is cited as being particularly related to the applicant's invention: Lin (6,413,801 B1). Lin teaches, for example in figure 4, a flip-chip mounted chip on a substrate that is fully encapsulated, an encapsulant channel and a second cavity of encapsulant. However, Lin does not teach the second encapsulant cavity above any section of substrate. In fact, Lin teaches that the cavity 60 is a 'dummy cavity" and that the dummy cavity would be cut off after molding is complete (see column 4, lines 8-14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Geyer whose telephone number is (571) 272-1958. The examiner can normally be reached on weekdays, between 10:00am - Application/Control Number: 10/681,513

Art Unit: 2812

6:30pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Lebentritt can be reached on (571) 272-1873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
